

# Logistics

- Do not sit next to each other: leave **exactly one empty seat between you and the person** next to you so that everyone fits
- Take out your calculator, pencils, pens, and cheat sheet
- Put your **phone and other electronics (except calculators) in your bag**
- **Place your bag in the corner of the room** on your way to pick up the exam and exam booklet
- Pick up the problem list and exam booklet; keep the **problem list face down until my command**
- When everyone has picked up an exam and is seated, turn the exam face up on my command.
- You have 180 minutes from then
- Submit your solutions in the box; you may keep the problem list
- Good luck!
